### Profile

Goal-oriented JavaScript, TypeScript and React Developer, looking to enhance my professional experience with an IT company specialising in web technology. Armed with a deep sense of responsibility and possessing very high levels of enthusiasm to give my 110% for any endeavour.

### Experience

#### • JavaScript Developer | Koji, Inc contract-based | July 2019 - present

Worked on useful open source projects built in TypeScript and React. Made fun games in React, p5.js that more than a thousand played!

#### • Maintainer | bulk-mail-cli side-project

Created the hassle-free email marketing and campaigning tool for geeks who use the command line interface. It is built using Node.js and TypeScript. Open Source.

<https://bulkmail.now.sh>

#### • Creator | pkgreview.dev side-project

Built this extensive project from scratch to the end. Has everything that a complex web-app needs. Made with React + Prisma + PostgreSQL + GraphQL in 7 days. It is the ratings and reviews website for NPM Packages.

<https://pkgreview.dev>

**Web Technologies:** styled-components, NextJS, GraphQL, Express

**Database and ORM:** PostgreSQL, Prisma for GraphQL

**Deployment Tools:** Now.sh, Heroku

More projects and their information at <https://kumar.now.sh>
