Skills

TypeScript, JavaScript, Node.js, React, Prisma, TRPC, Tailwind CSS, Styled Components, GraphQL, REST API, React Native, Expo, Express, Jest, Electron, Stripe, Solidity, Dapps, AWS S3, AWS EC2, MongoDB, JWT, OAuth, Firebase.

Also fiddled enough with Swift iOS, Python & Java :)

Profile

Goal-oriented engineer, looking to enhance my professional experience specializing in tech, management & finance. Armed with a deep sense of responsibility and possessing very high levels of enthusiasm to give my 110% for any endeavor.

Experience

● Software Engineer | Airchat

full-time | August 2023 - February 2024

Re-established and improved the Airchat Web Client, better Link Previews, helped the app get 2k+ installs via CTA and its accurate tracking, worked with the Java GRPC Backend, owned certain parts of the Airchat iOS app.

<https://getairchat.com>

● Founding Engineer | Deva.me

full-time | February - August 2023

Personalized LLMs for creators, a blockchain + AI startup, with a globally operated remote team partly based in SF Bay Area.

<https://deva.me>

● Software Engineer | Serendipity

full-time | August 2022 - February 2023

Worked extensively on perfecting the D3.js Network Graph mechanics. Shipped insanely complex CRDT based collaborative editing using a wide range of technologies; the frontend, the backend, and all the business logic. Shipped a Mac Desktop App for Serendipity power users.

● PM & Web 3.0 Developer | Monument Labs, Inc.

full-time | Dec 2021 - August 2022

As a Full-stack Web 3.0 Developer, I helped create all the Monument Smart Contracts currently deployed on the Ethereum Mainnet. Wrote and thoroughly tested the Monument ERC721 NFT Contract, and the Monument Marketplace Contract that supports buying & selling of NFTs and manages its auctions in a secure fashion.

As a Product Manager, I managed a team of 5 developers working on the Frontend, Backend, Web3 & the Monument iOS App. I brought order in chaotic times, and helped the company ship its MVP in a month using Scrum & Agile methodologies.

● Founder, CTO | Beam Community, Inc.

full-time | March 2020 - March 2022

Built entire product from start to finish, used tools like React, Node, GraphQL, MongoDB, Websocket, Twilio, Stripe, AWS EC2, AWS SES, Git, Cloudinary on production. As a founder, not just managed technical aspects of the company, but also UI/UX, Growth, and Product Management.
